

About Us

gig# platform is a one-stop solution on a platform where talent owners and talent seekers are matched widely to resolve a need that requires talents and is sustainably integrated with blockchain technology. Our Gig economy market aims to transform the future labour supply system, employment scare, content, and industrial culture by providing unlimited talent-sharing categories to showcase.

Discover Talents

Have a situation where it requires talents? Post it on the gig# platform! Searching for a talent made easy by the high quality user-to-user communication, social networks system and location-based technology.

Showcase Talents

Displaying a talent is a piece of cake. Gig# provides a platform where talents can be registered and showcased directly. Interested with a post of a talent seeker? Review, accept, resolve their needs and receive rewards.

Problems

1. Physical distance between buyers and sellers, such as efficient allocation of resources (time, people, capital, and etc.)
2. Cost problem within the ecosystem, regarding transparency, increased fees and reduced service of quality.

Opportunities

By 2025, Gig economy market will reach \$2.7 trillion, 540 million people worldwide will be able to secure short-term employment as predicted that 43% of all jobs will be Gig workers in the short term.

Breakthrough Solution! Everything Made Easy with Blockchain

The gig# platform creates a dynamic ecosystem in which high quality talent is traded between users and providers by optimizing the user-to-user communication system, social networks, and location-based technologies. Blockchain technology will be utilized to provide more reliable and satisfactory information where data storage and payment are guaranteed safely.
